

Denmark, Aarhus, June 2020

PRESS RELEASE

Baltic Control[®] has been appointed by General Administration of Customs in the People's Republic of China to inspect their imports of waste materials exported from Denmark to People's Republic of China (reference: Announcement of the General Administration of Customs No. 72 of 2020).

It is the second appointment Baltic Control[®] receives from People's Republic of China since the first appointment was confirmed in September 2019 covering import of waste from USA. Baltic Control[®] was the first foreign inspection company worldwide to receive an appointment by General Administration of Customs in People's Republic of China inspecting their waste import before shipment from country of origin.

"We are very proud that General Administration of Customs in the People's Republic of China now has appointed us for a new country, this time Denmark. This is a huge recognition from the Chinese authorities and is based on the previous months experience with outsourcing the waste import inspection to Baltic Control[®] in USA" says Mr. Martin Engstrøm Pedersen, CEO of Baltic Control[®].

Mr. Pedersen continues *"Baltic Control[®] holds similar waste inspection contracts with several other countries but to receive a second appointment on top of being the first inspection company outside China to receive their approval means a lot to us. It is our ambition to convince both Chinese to extend our cooperation to other countries, but also to convince authorities in other countries that they also can reap great benefits from Baltic Control[®] waste inspection expertise.*

The appointment covers iron and steel, non-ferrous metal scraps, paper and paperboard and is to ensure that waste complies with standards of People's Republic of China and meets the environmental requirements for imported waste and scrap from USA and now also Denmark.

For further information about the appointment please do not hesitate to contact Mr. Carsten Vammen, Business Development Manager at Baltic Control[®].
