

ACCREDITATION

for validation and verification

Reg. No 7512

Company	Baltic Control Certification A/S Herstedøstervej 27 D, 2620 Albertslund CVR: 38526677
Scope of accreditation	Validation and verification of <ul style="list-style-type: none">• Greenhouse gas emission reports, as specified in annex 1• Greenhouse gas emission reports regarding quantification and reporting of greenhouse gas emissions and removals at the organization level, as specified in annex 2• Greenhouse gas emission reports regarding quantification, monitoring and reporting of greenhouse gas emission reductions or removal enhancements at the project level, as specified in annex 3
Validity	2026-04-08 to 2028-10-30
Erstatter dokument af	2026-03-17
Basis for accreditation	DS/EN ISO/IEC 17029:2019 <p>The validation and verification body complies with the requirements in DS/EN ISO/IEC 17029:2019 - Conformity Assessment - General principles and requirements for validation and verification bodies, together with the relevant provisions as an accredited body for the above mentioned scope of accreditation.</p>

Lead Assessor

Validation and verification of Greenhouse gas emission reports

Specification of accreditation scope:

Commission Implementing Regulation (EU) 2018/2066 on the monitoring and reporting of greenhouse gas emissions pursuant to Directive 2003/87/EC

The accreditation is valid for verification of installations with the following activity groups:

Activity Group acc. to Regulation (EU) 2018/2067, Annex I (including amendments)
<u>Group 1c:</u> (EU ETS2) Verification of emissions covered by Chapter IVa of Directive 2003/87/EC

The verification body complies with the requirements in Commission Implementing Regulation (EU) 2018/2067 on the verification of data and on the accreditation of verifiers pursuant to the Directive 2003/87/EF of the European Parliament and of the Council with subsequent Implementing Regulations

The verification body complies with the requirements in EN ISO 14065:2021 - General principles and requirements for bodies validating and verifying environmental information

Validation and verification of Greenhouse gas emission reports regarding quantification and reporting of greenhouse gas emissions and removals at the organization level

Specification of accreditation scope:

ISO 14064-1:2019 Greenhouse gases - Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals

The accreditation is valid for validation and verification within the following competence sector groups:

Competence sector acc. to table F.1 in ISO 14066:2023
1 - Direct GHG emissions (excluding process emissions) and indirect GHG emissions from imported energy
2 - Process GHG emissions (non-combustion, chemical reaction and other)
3 - GHG emissions and removals from agriculture, forestry and other land use
6 - GHG emissions from decomposition of waste material

The validation and verification body complies with the requirements in EN ISO 14065:2021 - General principles and requirements for bodies validating and verifying environmental information

The validation and verification body complies with the requirements in ISO 14064-3:2019 - Greenhouse gases - Part 3: Specification with guidance for the verification and validation of greenhouse gas statements

Validation and verification of Greenhouse gas emission reports regarding quantification, monitoring and reporting of greenhouse gas emission reductions or removal enhancements at the project level

Specification of accreditation scope:

ISO 14064-2:2019 Greenhouse gases - Part 2: Specification with guidance at the project level for quantification, monitoring and reporting of greenhouse gas emission reductions or removal enhancements

The accreditation is valid for validation and verification within the following competence sector groups:

Competence sector acc. to table F.1 in ISO 14066:2023
1 - Direct GHG emissions (excluding process emissions) and indirect GHG emissions from imported energy
2 - Process GHG emissions (non-combustion, chemical reaction and other)
3 - GHG emissions and removals from agriculture, forestry and other land use
6 - GHG emissions from decomposition of waste material

The validation and verification body complies with the requirements in EN ISO 14065:2021 - General principles and requirements for bodies validating and verifying environmental information

The validation and verification body complies with the requirements in ISO 14064-3:2019 - Greenhouse gases - Part 3: Specification with guidance for the verification and validation of greenhouse gas statements
